## - How to Import additional fonts

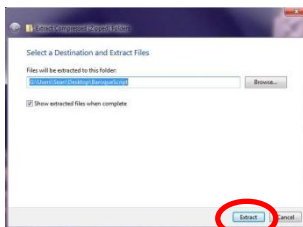

Most fonts from the internet are zipped (compressed), these files must be unzipped before installing.

First, download any True type or Open type fonts from the internet. Save the font to your computer. "Google Search Free True Type fonts"

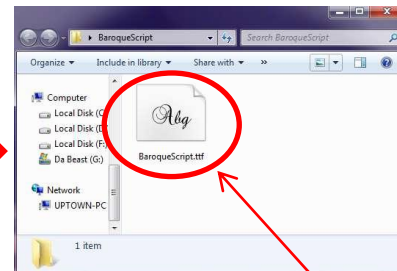

Right Click on the folder

Right click on the folder to, drop down menu will appear. Click on Extract All...

Select your destination or leave at default. Click on Extract to proceed.

Extracted File

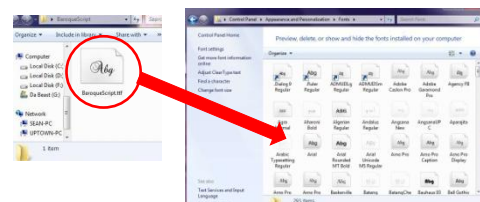

Click on the START Icon and then click on Control Panel

In the search box, type the word Fonts

Click on the highlighted word "Font"

Finally, drag and drop your font into the folder.
